

PATIENT HISTORY FORMS FOR OUTPATIENT CONSULTATION

Patient Instructions:

1. Fill out all other forms including this one to get you registered. Print this one out and then go to *forms* to get your financial and demographic forms completed.
2. Try to get all the records that relate to the reason you are being referred to us from your doctors and mail or fax them to us. This is far better than asking the doctor's office, as the request may not cause this to occur, i.e. we may not receive your information. It is especially important if there are particular bacterial cultures relating to your infectious disease problem.
3. Please bring a list of all the medicines prescribed and non-prescribed. This should include the dose and the frequency that you are taking them. Additionally, I would bring all your current prescription medications with you in a plastic baggie each time you come to the doctor.
4. Fill out the following forms in their entirety. Use the back of each form if you need the space.
5. Please bring a complete list of your immunizations including all dates.
6. Bring a list of all your current doctors including their addresses, phone numbers, fax and e-mail if available to you.
7. Bring a list of your current pharmacy with the phone number.
